

Physical Education

Advanced GCE A2 H554

Advanced Subsidiary GCE AS H154

Mark Scheme for the Units

January 2010

H154/H554/MS/10J

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

MARK SCHEME FOR THE UNITS

Unit/Content	Page
G451 An Introduction to Physical Education	1
G453 Principles and concepts across different areas of Physical Education	16
Grade Thresholds	44

G451 An Introduction to Physical Education

Section A – Anatomy and Physiology			Accept	Do not accept	
Answer all parts of the question.					
1 (a)	Use your anatomical and physiological knowledge to complete the table below for the athlete’s elbow during the upward phase of the bicep curl. 3 marks, 1 for each element of the table completed correctly. Accept first answer only				
	Joint	Joint Type	Movement	Agonist	Antagonist
	Elbow	1. Hinge or synovial hinge (synovial on own – TV)	2. Flexion	Biceps Brachii	3. <u>Tricep(s) Brachii</u>
	<p>What type of muscle contraction is occurring in the biceps brachii during the downward phase of the bicep curl?</p> <p>1 mark. Accept first answer only.</p> <p>4. eccentric or isotonic eccentric (isotonic on own = TV)</p> <p>Name one muscle in the trunk acting to maintain good posture and core stability during the biceps curl.</p> <p>1 mark. Accept first answer only.</p> <p>5.multifidis / transverse abdominis / rectus abdominis / (external) obliques / (internal) obliques / erector spinae / sacrospinalis /.</p> <p>(abdominals on own = TV) (rectus abdominals/abdominus rectus = BOD)</p>				
5 marks in total for question 1(a)					

Section A – Anatomy and Physiology		Accept	Do not accept
1 (b)	Using a serve in tennis, explain Newton’s three laws of motion. 5 marks. Sub max 2 if laws are stated but not applied. *Explanation must be clearly linked with the correct law.*	Additional guidance: Serve starts when player takes position and ends when opponent hits the return or the ball hits the net	
1. (N1)	law of inertia or Newton 1 states a body will remain in a state of uniform motion or at rest unless an (external) force acts upon it.	Candidates who write N1 or law of inertia and give the example of tennis that is embedded within the definition of the law = 2 marks.	
2. (e.g.N1)	law of inertia or Newton 1 states (ball) the tennis ball will remain in the server’s hand until s/he applies a force to the ball to toss it / (ball) the tennis ball will continue to travel vertically upwards or downwards (from the toss) until the force of the racket head changes its direction / (player) the tennis player needs to apply a force to the ground to allow them to stretch up or jump to hit the ball.		
3. (N2)	law of acceleration or Newton 2 states the acceleration or rate of change of momentum or velocity of an object is proportional to the force (and takes place in the direction in which the force acts.)	rate of change of speed = BOD Candidates who write N2 or law of acceleration and give the example of tennis that is embedded within the definition of the law = 2 marks.	speed or velocity of ball (without mentioning change) = TV
4. (e.g.N2)	law of acceleration or Newton 2 states (ball) the harder the player hits the ball the faster it will travel (in the direction it has been hit) / (player) the greater the force applied to the ground the faster or further the player will jump into the air.		(for ball) the further it will travel
5. (N3)	law of reaction or Newton 3 states for every action there is an equal and opposite reaction.	Candidates who write N3 or law of reaction and give the example of tennis that is embedded within the definition of the law = 2 marks.	‘action reaction’ as explanation
6. (e.g.N3)	law of reaction or Newton 3 states (ball) the racket strings apply a force to the ball and the ball will apply an equal and opposite force to the strings or vice versa / (player) to jump to hit the ball, the player applies a downward or action force on the ground that applies an upward (reaction) force on the player / (player) to jump to hit the ball, the player applies a force on the ground that applies an opposite force on the player		
5 marks in total for question 1(b)			
Additional guidance: ‘law of inertia - the harder the player hits the ball, the faster it will travel’ = 0 marks = (N1 identified but application = N2, which has not been identified) ‘law of inertia – a body will remain in a state of rest in hand unless a force acts upon it’ = 1 mark for point 1 = (law identified but not applied to tennis serve) ‘law of inertia – a tennis ball remains in player’s hand until they apply a force to toss the ball’ = 2 marks = application embedded within definition of N1 – hits point 1 and point 2)			

Section A – Anatomy and Physiology		Accept	Do not accept
1 (c)	Give <u>three</u> mechanisms which maintain venous return during exercise. 6 marks		
Mechanisms - sub max 3. Mark first three answers only.			
1	skeletal or muscular or muscle pump	Accurate descriptions	
2	(pocket) valves		
3	respiratory (muscle) pump		
4	smooth muscle		
5	gravity from above the heart		gravity on own
	Explain how the increase in blood flow affects cardiac output. sub max 3		
Frank-Starling's law (of the heart)			
6	more blood returning to the right atrium or heart		increase in blood flow/ increased venous return = Rep
7	increased stretch of the myocardium or heart wall (during ventricular diastole) / increased end diastolic volume	EDV or end diastolic volume	
8	causing greater force of contraction (during ventricular systole) / decreased end systolic volume	ESV for end systolic volume	
9	(as SV = EDV-ESV) stroke volume increases/more blood pumped out of the heart per beat	SV for stroke volume	
10	cardiac output = heart rate x stroke volume	Q or CO for cardiac output	
11	(therefore) cardiac output increases		
12	(more blood returning to the right atrium or heart) directly stimulates or triggers the SA node or causes increased firing rate of SA node (which increases heart rate)		pacemaker
6 marks in total for question 1 (c)			

		Accept	Do not accept
1 (d) Describe the neural mechanisms which cause heart rate to change <u>during</u> exercise.			reference to adrenalin
4 marks – Sub max 2 for points 1-4			
1. (chemo)	chemoreceptors detect increase in (pp)CO ₂ or acidity or lactic acid or lactate or decrease in (pp)O ₂ or pH (of the blood)		change on own
2. (proprio)	proprioceptors detect movement		
3. (baro)	baroreceptors detect increase in (blood) pressure or / baroreceptors detect stretch of the arterial or blood vessel walls		
4. (thermo)	thermoreceptors or temperature receptors detect increase in <u>blood</u> temperature		
5. (CCC)	information sent to the cardiac control centre or CCC (in the medulla oblongata)		
6. (sympathetic)	(via the) sympathetic nervous system or SNS	autonomic or autogenic nervous system or ANS or sympathetic system or sympathetic control = BOD	
7. (nerve)	(impluses sent) down the (cardiac) accelerator nerve (to the SA node)		
8. (SA node)	to stimulate the SA node / increase firing of the SA node		pacemaker
4 marks in total for question 1 (d)			

Section A – Anatomy and Physiology		
1 (e)	Discuss the positive and negative effects on the skeletal system of young people performing: <ul style="list-style-type: none">• Contact sports• High impact sports• Activities involving repetitive actions. 10 marks – Levels marked question	
Level 3 8-10 marks	A comprehensive answer: <ul style="list-style-type: none">• detailed knowledge & understanding• effective analysis/critical evaluation and/or discussion/explanation/development• clear and consistent practical application of knowledge• accurate use of technical and specialist vocabulary• high standard of written communication.	Discriminators from L2 <u>are likely</u> to include: <ul style="list-style-type: none">• balanced discussion of both positive and negative aspects• successful development of some specific conditions i.e. osteoporosis, osteoarthritis, growth plates, joint stability, posture and alignment
Level 2 5-7 marks	A competent answer: <ul style="list-style-type: none">• satisfactory knowledge & understanding• analysis/critical evaluation and/or discussion/explanation/development attempted with some success• some success in practical application of knowledge• technical and specialist vocabulary used with some accuracy• written communication generally fluent with few errors	Discriminators from L1 <u>are likely</u> to include: <ul style="list-style-type: none">• both positive and negative aspects covered although more detail may be evident in one• reference to some specific conditions i.e. osteoporosis, osteoarthritis, growth plates, joint stability, posture and alignment
Level 1 0-4 marks	A limited answer: <ul style="list-style-type: none">• basic knowledge & understanding• little or no attempt to analyse/critically evaluate and/or discuss/explain/develop• little or no attempt at practical application of knowledge;• technical and specialist vocabulary used with limited success;• written communication lacks fluency and there will be errors, some of which may be intrusive	
1 (e)	Indicative content: Candidate responses are likely to include: (relevant responses not listed should be acknowledged)	
Care must be taken not to credit effects on the muscular system. i.e. watch out for sprain (ligament) = OK but strain (muscle) = IRR		

Section A – Anatomy and Physiology			
Numbered points = knowledge and understanding		Bullet points = likely to be development of knowledge	
POSITIVE EFFECTS	Contact sports	High Impact sports	Repetitive actions
	e.g. rugby, American football	Aussie rules netball, basketball, some events in track and field, gymnastics	e.g. run, row, swim, constantly practise technique i.e. tennis serve etc
	football		
1. stronger or healthier bones / increase in peak bone density or calcium deposits <ul style="list-style-type: none"> reduced risk of osteoporosis osteoporosis is the weakening of bones or loss of bone density <ul style="list-style-type: none"> making bones more prone to fractures or damage reduced risk of damage to growth plates weight bearing activities are best to improve bone health. 	✓	✓	✓
2. healthier joints / increase in thickness of articular or hyaline cartilage <ul style="list-style-type: none"> greater ability to absorb shock so reduced risk of injury reduced risk of developing osteoarthritis in later life osteoarthritis is a degenerative disease due to loss of articular or hyaline cartilage at the ends of long bones 	✓	✓	✓
3. stronger ligaments (stronger tendons = BOD) <ul style="list-style-type: none"> increased joint stability less risk of injury or joint trauma e.g. sprains, dislocations etc joint trauma can lead to osteoarthritis in later life 	✓	✓	✓
4. better lubrication of joints by synovial fluid <ul style="list-style-type: none"> improves joint health aids flexibility 	✓	✓	✓
5. decreased mechanical strain on joints due to exercise helping to manage weight as part of an active, healthy, balanced lifestyle <ul style="list-style-type: none"> reduces risk of osteoarthritis prevents sedentary lifestyle that can be linked with osteoporosis in later life 	✓	✓	✓

Credit description of condition once only e.g. if description of OA credited for positive it cannot be credited for negative.

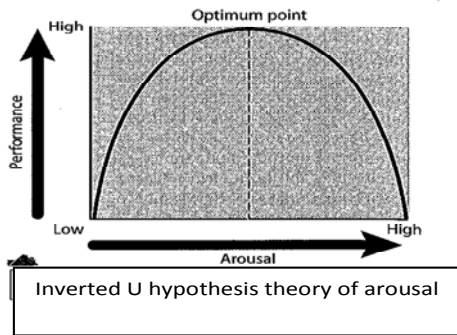

NEGATIVE EFFECTS	Contact sports	High Impact	Repetitive actions
-------------------------	----------------	-------------	--------------------

Section B: Acquiring Movement Skills		Accept	Do not accept
6. increased risk of damage to articular/hyaline cartilage or increased risk of wear and tear on articular cartilage <ul style="list-style-type: none"> increased risk of joint trauma e.g. sprain, dislocation (cartilage or meniscus) tear etc which can lead to osteoarthritis in later life osteoarthritis - degenerative / loss of articular/hyaline cartilage at the ends of long bones 	✓	✓	✓
7. increased risk of ligament being stretched or torn / sprain / (tendon tear = BOD) <ul style="list-style-type: none"> decreased joint stability 	✓	✓	
8. increased risk of damage to growth plates or immature bone <ul style="list-style-type: none"> plate of cartilage or immature bone is at the end of long bones or between the epiphysis and diaphysis the growth plate closes towards the end of adolescence e.g. Tom Daley – limited number of platform dives a day 	✓	✓	✓
9. increased risk of an impact or acute injury/ break or fracture e.g. or dislocation or sprain or (meniscus) tear or joint separation i.e. acromioclavicular or ac joint eg Rooney metatarsal <ul style="list-style-type: none"> after break bone is stronger the safest types of physical activity is aerobic or submaximal or low to medium intensity 	✓	✓	
10. increased risk of overuse or chronic injury e.g. tendinitis or tennis or golfer's or thrower's elbow or <u>stress</u> fracture or shin splints or Osgood schlatter syndrome or chondromalacia patella or runner's knee			✓
11. increased risk of inflamed bursa or bursitis <ul style="list-style-type: none"> bursa is a fluid filled sac which cushions and lubricates the joint where friction is likely to occur 			✓
e.g. effects relevant to the knee joint <ul style="list-style-type: none"> hinge joint and so injury prone at particular risk of damage to ligaments e.g. anterior/posterior cruciate, medial/lateral collateral risk of meniscus tear– very common in impact & contact sports 	e.g. effects relevant to the shoulder joint <ul style="list-style-type: none"> shallow joint and so prone to dislocation ball and socket joint but much less stable than the hip head of humerus very loosely fits into glenoid fossa of scapula 		
	Section A Total [30]		

2 (a)	<p>Identify a motor skill in sport and justify its classification on the open closed continuum. Explain which practice methods would be most appropriate for this skill. 6 marks - a motor skill must be identified If motor skill is wrongly classified (e.g. a free throw is an open skill) do not carry error forward - mark justification positively.</p>		
Justification for open classification/Open because: Sub max 3			E.g. A pass or shot in hockey / sailing
1.	the environment or others affect the skill / environment is unstable or changing or unpredictable / performer has to adapt to changing environment		
2.	predominantly perceptual / needs a lot of perception or judgement or interpretation		
3.	there is much information to process/ the skill is more complex / lots of decision making		
4.	the skill is externally paced / the speed or timing of the skill is dictated or controlled by others		
OR Justification for closed classification/Closed because: Sub max 3			E.g. swimming strokes / gymnastics movements e.g. vault
5.	the environment or others do not affect the skill / environment is stable or unchanging or predictable		
6.	predominantly habitual / the same pattern of movements is repeated.		
7.	there is little information to process / the skill is simple / fewer stimuli / fewer responses.		
8.	the skill is internally or self paced / the performer controls the speed of the skill.		
Explanation of practice methods: Sub max 3 NB practice method must be stated to gain mark			
Practice methods for open skills			
9.	varied practice should be used to motivate / to build interest or schema / give different experiences / simulates game situation		varied prac on own
OR Practice methods for closed skill:			
10.	fixed practice should be used to form habits / to develop motor programmes		
Practice methods for open OR closed skills			
11.	distributed practice should be used to allow for recovery / feedback / coaching		
12.	Whole part whole for open skills to correct faults or give specific coaching		
13.	massed practice should be used to form habit /to develop motor programmes		
14.	whole practice should be used for understanding of environment		
15.	whole part whole or part practice should to develop or improve (weak) subroutines		
16.	whole practice should be used to give idea or understanding or a mental picture or holistic view of skill		
17.	(progressive) part practice should be used to give early success / to motivate or give confidence / to help understanding the skill / for more complex skills / if skill is dangerous / to increase safety	6 marks in total for question 2 (a)	

2 (b)	Explain <u>the role</u> of mental practice in the performance of movement skills. 4 Marks
	Do not accept
1.	(helps) create a mental picture of the skill / helps performer to visualise performance It is visualisation It is imagery It is rehearsal A description of MR A practical example alone <i>'a sprinter goes over a picture in her mind'</i> <i>'a sprinter might visualise the start of the race.'</i>
2.	Helps understanding of requirements.
3.	Helps visualise fault correction.
4.	Activates nervous impulses / cuts down on reaction time.
5.	Helps to discard irrelevant information / maintains focus or selective attention.
6.	Visual representation remembered better/ helps performer remember what skill should look like
7.	Can organise information for storage/increase storage capacity.
8.	Can improve confidence /can increase optimism.
9.	Helps to control arousal levels.
4 marks in total for question 2 (b)	

2 (c)	Learning and performing movement skills often involves the use of the memory process. Describe the multi-store memory <u>process</u> when performing movement skills. 4 marks		
		Accept	Do not accept
1.	(involves the) short-term sensory store or STSS and short-term memory or STM and long-term memory or LTM	Only if in correct order/ accurate diagram in correct order	
For points 2-5, emboldened points and description required for each mark			
2.	(involves the) short-term sensory store or STSS selective attention happens / important information is filtered in / irrelevant information is filtered out		
3.	(Involves the) short-term memory or STM organises or chunks information / encodes information to LTM		
4.	(Involves the) long-term memory or LTM stores or remembers information or patterns of movement indefinitely / decodes information (to STM) / stores motor programmes (used to perform movements) / associates (current) performance with previous performances (to recognise strengths and weaknesses)		
5.	Memory process affects or influences perception / helps judge or interpret what needs to be done (to perform the movement)		
4 marks in total for question 2 (c)			

2 (d)	Using the Inverted U theory and a practical example explain how levels of arousal can affect the performance of movement skills. 6 marks - 1 mark for practical example Point 1 required for max 6		
1	(example)award when practical example is clearly linked with a theory point		
	Under arousal a golfer drives but fails to hit the green/drives short a sprinter slow out of blocks as not stimulated enough a rugby tackle may be half hearted – and attacking player runs through	Optimal arousal a golfer needs moderate arousal to drive effectively and hit the green/target area a sprinter is quick out of the blocks and therefore most likely to perform well a rugby player makes clean, effective tackle	Over arousal in golf can cause loss in technique so performance can be lowered/drives too long/wide sprinter may false start due to excessive stimulation rugby player may have lack of control when tackling / high tackle giving away a penalty
Sub max 5 for points 2-5			
			Additional guidance Both axes must be named correctly <ul style="list-style-type: none">• Arousal (x axis)• Performance (y axis) and labelled: <ul style="list-style-type: none">• Low to high OR with arrow clearly showing increase• Optimum point named
3	as arousal increases so does performance but only up to a point or optimum level / optimum performance at moderate levels of arousal		
4	if arousal is too high or performer highly aroused then performance will decrease/ under arousal leads to poor performance		
5	theory is modified depending on personality of performer / extrovert performs well with high arousal / introvert underperforms (or extrovert performs well) with high arousal		
6	theory is modified depending on the ability or skill of performer / performer in cognitive stage achieves optimum performance with low(er) levels of arousal / beginner can only cope with low(er) levels of arousal / performer in autonomous stage achieves optimum performance with high(er) levels of arousal		
7	theory is modified depending on the nature of the task / fine or complex skills performed most effectively at low(er) levels of arousal / gross or simple skills performed most effectively at high(er) levels of arousal		
8	Inverted U does not explain sudden decreases in performance		
6 marks in total for question 2 (d)			

2 (e)	<p>Using practical examples, explain the process of observational learning when it is used for acquiring movement skills <u>and</u> learning to follow an active and healthy lifestyle. Refer to Bandura's model in your answer.</p> <p>10 marks – Levels marked question</p>	
<p>Level 3</p> <p>8-10 marks</p>	<p>A comprehensive answer:</p> <ul style="list-style-type: none"> • detailed knowledge & understanding • effective analysis/critical evaluation and/or discussion/explanation/development • clear and consistent practical application of knowledge • accurate use of technical and specialist vocabulary • high standard of written communication. 	<p>Discriminators from L2 <u>are likely to</u> include:</p> <ul style="list-style-type: none"> • four parts of the model addressed: i.e. attention/retention/motor reproduction/motivation • valid movement and BAHL examples given
<p>Level 2</p> <p>5-7 marks</p>	<p>A competent answer:</p> <ul style="list-style-type: none"> • satisfactory knowledge & understanding • analysis/critical evaluation and/or discussion/explanation/development attempted with some success • some success in practical application of knowledge • technical and specialist vocabulary used with some accuracy • written communication generally fluent with few errors 	
<p>Level 1</p> <p>0-4 marks</p>	<p>A limited answer:</p> <ul style="list-style-type: none"> • basic knowledge & understanding • little or no attempt to analyse/critically evaluate and/or discuss/explain/develop • little or no attempt at practical application of knowledge; • technical and specialist vocabulary used with limited success; • written communication lacks fluency and there will be errors, some of which may be intrusive 	

2 (e)	Indicative content: Candidate responses are likely to include: (relevant responses not listed should be acknowledged) Numbered points = knowledge / understanding Bullet points = likely to be development of knowledge
<p>Indicative content:</p> <ol style="list-style-type: none"> 1. Demonstration – watching demonstration/watching the model <ul style="list-style-type: none"> • (accurate development of demo. point) 2. Attention 3. performer cues in to or selectively attends to or focuses or concentrates (on aspects of display or demonstration) <ul style="list-style-type: none"> • role models or high status performers or significant others draw focus / role model educate or encourage or shows how to follow an active and healthy lifestyle / degree of attention is influenced by attractiveness or status of model • key points highlighted / verbal guidance used to highlight key aspect of demo e.g. (movement skill) focus on or watch the arm action of a successful performer's tennis serve e.g. (BAHL) watching or seeing a role model or significant other who does not smoke / or whose alcohol intake is moderate e.g. (BAHL) watching a successful tennis player who follows a healthy lifestyle e.g. (BAHL) regular participation in sport by popular people encourages observer to follow active lifestyle 4. Retention 5. observer needs to remember the demo or movements or behaviours watched <ul style="list-style-type: none"> • repetition of the demonstration or role model's movements or behaviours will aid memory / demo or information should be repeated e.g. (movement skill) coach repeats or gets another athlete to repeat demo of triple jump or other skill e.g. (BAHL) information about importance of not smoking / moderation in alcohol consumption is repeated so learner remembers key information • use of mental rehearsal or imagery can help (observer retain demonstration) e.g. (movement skill) imagining the movement of arm action in a tennis serve may help retention/performer mentally rehearses serve • symbolic coding by using key/catch phrases can help retention of demonstration e.g. (movement skill) use of phrases such as 'clean palm, dirty neck' (Shot Putt) e.g. (BAHL) catch phrases such as '<i>change for life</i>' or '<i>five a day</i>' 6. Motor reproduction 7. observer must be capable of performing the skill / or information must be at a level relevant to performer / performer must be able to match demonstration <ul style="list-style-type: none"> • observer must have physical capacity to perform skill or follow lifestyle choices • performer must have mental capacity to understand skill or lifestyle choices e.g. (movement skill) a young child will not be able to perform a slam dunk (basketball) / must have leg strength to complete all three phases of triple jump/ lower school performers must understand components of triple jump e.g. (BAHL) learners must understand the benefits of not smoking / of a balanced diet 8. Motivation – 	

9. observer must have drive to or want to learn to copy model

- use of praise or positive reinforcement (to encourage drive to copy model)

e.g. (movement skill) coach praises or positively reinforces successful copying of tennis serve / coach uses praise or positive reinforcement to encourage copying of demonstration

e.g. (BAHL) parents praise or support your healthy or lifestyle / role model praises learner for not smoking / moderating alcohol consumption / for exercising / badge given for eating healthily or exercising

e.g. (BAHL) learners must have mental willpower to stop smoking/moderate alcohol consumption

10. Matching performance – performer imitates demonstration

Further discussion might include:

11. copying more likely if behaviour is **socially acceptable**/follows **social norms**

e.g. (movement skill) if sportsmanship shown by tennis player / if tennis player always does thorough warm up

12. copying more likely if behaviour or skill is considered to be **relevant** (to needs)

- Observer will try to copy model if they can see how copying (the behaviour or skill) will positively affect performance or lifestyle

e.g. (movement skill) observer / player wants to play tennis or improve tennis serve or get fitter

e.g. (BAHL) observer / player wants to follow an active lifestyle to make friends

13. copying more likely if observer can **identify with** model or demonstrator

- Same sex / age / race / ability model will encourage copying

e.g. (movement skill) female observer more likely to try to copy serve of female demonstrator

e.g. (BAHL) male observer more likely to want to copy active lifestyle of male demonstrator

14. reference to bobo dolls experiment

Section B Total [30]

Section C: Socio-Cultural studies relating to participation in physical activity			Accept	Do not accept
3 (a) It is widely accepted that physical activity is part of a healthy lifestyle. However, people lead more sedentary lifestyles now than in the past. (i) Identify reasons for increasingly sedentary lifestyles in the UK today. 3 marks				Lack of money or facilities or motivation Lack of opportunity, provision, esteem. /due to recession
1.	(deskbound)	more desk or office jobs / less manual work / exercise now a choice not necessity		
2.	(work)	more time at work / long hours at work / work increasingly demanding / concentrating on careers		'Lack of time ' on own
3.	(gadgets)	labour saving gadgets or machines / accept suitable example e.g. sit-on mowers /TV channel controls		
4.	(cars)	widespread car use / children driven to school		
5.	(technology)	technology / computer use / shopping on-line / computer games		
6.	(parents)	parents don't exercise / limited role modelling		
7.	(concern)	children don't play outside / fear of allowing children to play out		
8.	(TV)	More TV channels / people watch sport on TV / people watch rather than participate		
(ii) What are the physical activity recommendations for active lifestyles? 2 marks				
1.	(5 a week)	(adults) 30 mins 5 times a week		Any alternatives
2.	(moderate)	Moderate level / able to speak during exercise / feel breathless / recover within 10 mins of stopping	Sub max level Aerobic level	
3.	(children)	for children or young people 60 minutes a day	for children 5 or 6 or 7 x 60 mins per week	60 mins a day on own
4.	(high impact)	for children (at least) twice a week higher impact activities should be included (e.g. skipping or jumping)		
6 marks in total for question 3 (a)				

Section C: Socio-Cultural studies relating to participation in physical activity			Accept	Do not accept
3 (b)	Identify one difference between Outdoor Recreation and Outdoor Education and explain why there is limited regular participation in Outdoor Education by young people. 5 marks - 1 mark for difference			
Difference:	Outdoor Rec.	Outdoor Ed - need direct comparative point for 1 mark		
1.	(difference)	for enjoyment or fun in own time / when participant chooses / leisure time / hobby Organised or lead by self or non-specialists	for learning in school or college time / extracurricular / if compulsory in a school Organised or lead by school or OEd centre or specialists	Organisation: accept reference to different levels of formality. So, informally v formally arranged OEd more structured or organised
explain why there is limited regular participation in Outdoor <u>Education</u> by young people. Sub max 4				
2.	(staff)	lack of staff expertise of qualifications / staff ratios		lack of staff on own
3.	(funding)	cost of or lack of transport or specialist equipment / insufficient funding to employ or to train specialist staff / need for voluntary contributions / schools not able to charge for out of school activities		OEd is expensive / due to money / 'can't afford it' / lack of funding on own
4.	(risk)	teachers reluctant to take on responsibility / staff uneasy with risk factors / lack of parental consent / complex risk assessment / health and safety / media highlighting tragedies or risks or possible problems		not safe
5.	(distance)	distance from facilities / schools in cities so difficult to get to natural environment or to specialist facilities		access to facilities on own
6.	(time)	not enough time / restrictions on time table / pressure on curriculum / exam work		
7.	(facilities / equipment)	need for specialist or appropriate facilities or equipment / e.g. no canoes	'correct' facilities	no space / 'lack of facilities' on own / don't have resources
8.	(NC)	not compulsory part of NC		not on NC
5 marks in total for question 3 (b)				

Section C: Socio-Cultural studies relating to participation in physical activity			Accept	Do not accept
3 (c)	<p>In the UK various organisations are involved with physical activity. Describe the work of both: Home country organisations (such as Sport England) The British Olympic Association (BOA) 5 marks - sub max 3 from one section.</p>			
Home Country organisations - Sub max 3				
1.	(participation)	(works to) increase participation or get more people involved (in sport) / promote community sport or active communities / make countries 'active sporting nations' / start, stay, succeed / tries to reduce dropout	Builds foundation of Sports development pyramid. (so helps more people to excel)	
2.	(campaigns)	accept any relevant campaign e.g. ' <i>(Get) Active</i> ', ' <i>Sporting champions</i> ', ' <i>Sport Action Zones</i> '.	Other valid HC campaigns should be accepted	
3.	(govt support)	supports government targets / e.g. supports PESSCL strategy	PESSYP	works with schools
4.	(funding lottery)	provides or distributes lottery or government funding / invests in community sport		provides funding on own Funds or provides equipment or facilities
5.	(promotion)	Promotes or encourages volunteering / coaching / leadership / officiating (to get people involved)		supports coaches
6.	(target groups)	targets priority groups (e.g. disabled or elderly)		
7.	(cooperation)	works with other organisations (e.g. NGBs/ HE/FE / local govt/YST/UK Sport/ LOCOG) /shares good practice / encourages co-operation or partnerships between organisations / promotes network of clubs, coaches, facilities and volunteers	Works with sports colleges	
8.	(2012)	works to ensure that London 2012 leaves a sporting legacy.		
9.	(excellence)	responsible for funding elite performers in some sports (e.g. squash / netball)		funds elite performers on own
10.	(information)	provides information or expertise or advice (e.g. on coaching/facilities/sports development)		
11.	(playing fields)	Protects community playing fields		

Section C: Socio-Cultural studies relating to participation in physical activity			Accept	Do not accept
The British Olympic Association (BOA) - Sub max 3				
12.	(promotion /2012)	promotes Olympic Games / develops Olympic Movement / organises Olympic day / promotes public relations / involved with organising London 2012		
13.	(bids)	works on Olympic bids		
14.	(sponsors)	appoints or works with official sponsors for 2012 Games / fund raises	attracts sponsorship	Sponsors athletes
15.	(Team GB organisation)	Helps select Team GB /supports or prepares or manages or organises Team GB / provides workshops or training for Team GB (e.g. on motivation or performance lifestyle)	Organises Britain's involvement in the Olympics	
16.	(camps)	provide pre-Games training camps		
17.	(cooperation)	Works with IOC/other named organisations e.g. UK Sport		Works with other organisations on own
5 marks total for question 3 (c)				

Section C: Socio-Cultural studies relating to participation in physical activity			Accept	Do not accept
3 (d)	The game of American Football is extremely popular in the USA Give reasons for the violence and commercialism associated with American Football. 5 marks - sub max 3 from one section.			
Violence: Sub max 3				
1.	(frontier spirit)	pioneer or frontier spirit / reflects life of early settlers / gun culture		American Dream reference/rags to riches
2.	(rules)	rules allow or encourage violence / contact or impact sport		
3.	(crowd)	crowd wants violence or a sensational or exciting spectacle		competitive nature of supporters
4.	(winning)	(due to) importance of winning / emotional intensity / high stakes / amount of money involved / professional game / coach 'hire and fire'	'win ethic' / win at all costs / Lombardian ethic/ <i>'it's all about winning'</i> =BOD	due to sponsorship of players or teams /competitive nature of game / due to links with commercialism
5.	(protection)	protective clothing or armour / de-humanised opponents		
6.	(military)	(pseudo military) language (e.g. platoons, 'bomb,' sack opposition)		
7.	(specialists)	due to specialists within team (e.g. specialist defensive team players such as line backers of defensive tacklers)		
8.	(tradition/ early days)	game traditionally violent / some deaths in early days / in early days president intervened to clean up game		early game had no or few rules
9.	(generic)	frustration with officials or opponents or team mates / provocation or abuse / lack of punishment or deterrent		crowd behaviour/result/score
Commercialism: Sub max 3				
10.	(capitalism)	(links with) capitalism		<i>'all about money'</i>
11.	(sponsors)	opportunity for sponsors or profit making		
12.	(TV)	game designed for or suits TV / TV or media controls the game / competition for TV Rights / commercial breaks		It is on TV
13.	(franchise /)	teams run as 'franchises or businesses	teams make money	
14.	(Super Bowl)	Super Bowl is a huge commercial event / Super Bowl has worldwide coverage		
5 marks total for question 3 (d)				

3 (e)	Discuss social and cultural factors that affect participation in physical activity in the UK. 10 marks – Levels marked question	
Level 3 8-10 marks	A comprehensive answer: <ul style="list-style-type: none"> • detailed knowledge & understanding • effective analysis/critical evaluation and/or discussion/explanation/development • clear and consistent practical application of knowledge • accurate use of technical and specialist vocabulary • high standard of written communication. 	Discriminators from L2 <u>are likely to</u> include: <ul style="list-style-type: none"> • • •
Level 2 5-7 marks	A competent answer: <ul style="list-style-type: none"> • satisfactory knowledge & understanding • analysis/critical evaluation and/or discussion/explanation/development attempted with some success • some success in practical application of knowledge • technical and specialist vocabulary used with some accuracy • written communication generally fluent with few errors 	Discriminators from L1 <u>are likely to</u> include: <ul style="list-style-type: none"> • • •
Level 1 0-4 marks	A limited answer: <ul style="list-style-type: none"> • basic knowledge & understanding • little or no attempt to analyse/critically evaluate and/or discuss/explain/develop • little or no attempt at practical application of knowledge; • technical and specialist vocabulary used with limited success; • written communication lacks fluency and there will be errors, some of which may be intrusive 	

3(e) Indicative content: Candidate responses are likely to include: (relevant responses not listed should be acknowledged)

Numbered points = knowledge / understanding **Bullet points** = likely to be development of knowledge

(Opportunity)

1. time available

- employment or unemployment / work commitments

2. income or money

- employment or unemployment
- if you can you afford club membership or afford lessons or equipment etc

3. ability or skill or fitness levels / health

4. choice / don't want to participate in physical activity / can't be bothered

- do other things / unaware of health benefits
- technology / computer use
- computer games Wii/Xbox – positive or negative
- armchair culture/increasingly sedentary lifestyles/inactive society

(Provision) availability of:

5. facilities / equipment

6. clubs / classes / courses

7. coaches or leaders

8. transport / access to or from rural areas

(Esteem)

9. Esteem or confidence

- links to body image
- embarrassed due to body shape (which doesn't match TV/media perfection)
- intimidation

10. Stereotyping / myths

- self-fulfilling prophecy - when a minority group accepts society's view or conforms to stereotype
e.g. when a working class person accepts that they are unlikely to be a tennis or golf star

(Minority groups)

- 11. Discrimination or unfair treatment
- 12. Gender
 - provision of suitable activities / suitable timings / lack of crèche facilities
- 13. Disability
 - specialist facilities or equipment
 - specialist clubs or teams
- 14. Race or religion
 - some groups have negative attitudes towards sport
 - e. g.** Asian women may not take part due to sub-cultural values or personal reluctance
- 15. Age - young or elderly
 - bad experience at school so put off for life
 - lack of suitable instructors or coaches
- 16. Class
 - class constraints leading to limited access
 - e.g.** access to a polo club or a private tennis or golf club
- (Other)**
- 17. Power of media to influence participation
 - **unaware** of opportunities / poor advertising
- 18. Influence of role models/family /friends
- 19. School experience - positive or negative
 - **time** devoted to sport and PE in school
 - e.g.** if at a sports college or independent school
- 20. Weather
 - limitations or restrictions due to climate or weather
 - not as favourable as other countries
- 21. natural landscape/topography
 - e.g.** mountains for skiing
- 22. London 2012 – impact and influence
- 23. Campaigns
 - Work of Home Country Councils **e.g.** Sports Council for Wales **e.g.** a named campaign to promote participation

Section C Total [30]

The following annotations were used in the marking of unit G451.

✓ (Tick)	Tick
x (Cross)	Cross
BOD	Benefit of the doubt
REP	Repeat
?	Unclear
L1	Level 1
L2	Level 2
L3	Level 3
KU	Knowledge and Understanding
EG	Example/Reference
TV	Too Vague
DEV	Development
SEEN	Noted but no credit given
IRRL	Significant amount of material which does not answer the question

G453 Principles and concepts across different areas of Physical Education

Question Number	Expected Answer	Mark																											
Section A - Historical Studies (Option A1)																													
1 (a)	<p>Social and cultural factors influence participation and performance in physical activity. Explain how socio-cultural factors influenced the characteristics of popular recreation in pre-industrial Britain. State how one of these factors continues to impact on participation and performance today.</p> <p>5 marks for 5 of: sub max 4 for impact of socio-cultural features sub max 1 for how factors impact today</p> <p>Impact of socio-cultural factors on popular recreation Socio-cultural factors...so...Popular recreations were/had</p> <table> <tr> <th></th><th>Socio-cultural factors</th><th>Popular rec characteristics</th></tr> <tr> <td>1</td><td>limited transport and/or communications</td><td>local</td></tr> <tr> <td>2</td><td>illiteracy/no NGBs/uneducated</td><td>uncodified/simple rules/limited organisation</td></tr> <tr> <td>3</td><td>reflection of life and times/harsh society</td><td>cruel and/or violent</td></tr> <tr> <td>4</td><td>seasonal time/free time on Holy Days or annual holidays</td><td>occasional/festival</td></tr> <tr> <td>5</td><td>before industrial or urban revolution/before migration to towns/population centres on village or county town life/lack of technology</td><td>rural/natural/simple</td></tr> <tr> <td>6</td><td>work sometimes became the basis of play (eg. footmen become pedestrians)</td><td>occupational</td></tr> <tr> <td>7</td><td>rags to riches/increase income</td><td>wagering</td></tr> <tr> <td>8</td><td>two class society/feudal system</td><td>courtly and popular/upper/gentry class activities and lower or peasant class activities</td></tr> </table> <p>How factors continue to impact today – credit relevant explanation</p> <p>9 Transport eg not having a car so unable to get to sports centre 10 Time eg working long hours so unable to get to gym/traditional holidays 11 Money eg unemployed so unable to afford club membership/wagering to make money/professional 12 Class eg unable to play certain games such as golf or polo as considered to be middle (or upper) class 13 Education continues to be important in activities/healthy and active lifestyle</p>		Socio-cultural factors	Popular rec characteristics	1	limited transport and/or communications	local	2	illiteracy/no NGBs/uneducated	uncodified/simple rules/limited organisation	3	reflection of life and times/harsh society	cruel and/or violent	4	seasonal time/free time on Holy Days or annual holidays	occasional/festival	5	before industrial or urban revolution/before migration to towns/population centres on village or county town life/lack of technology	rural/natural/simple	6	work sometimes became the basis of play (eg. footmen become pedestrians)	occupational	7	rags to riches/increase income	wagering	8	two class society/feudal system	courtly and popular/upper/gentry class activities and lower or peasant class activities

2 (b)	<p>Describe strategies and provision for mass participation in physical activity in the USA. Explain why opportunities for mass participation are considered to be greater in the UK than in the USA.</p> <p>5 marks for 5 of: Sub max 3 from either section:</p> <table border="1"> <tr> <td colspan="3">Strategies/provision in the USA:</td></tr> <tr> <td>1</td><td>(Title IX)</td><td>Title IX/equality of provision/equality of funding</td></tr> <tr> <td>2</td><td>(role models)</td><td>Promotion of role models to encourage participation</td></tr> <tr> <td>3</td><td>(midnight leagues)</td><td>Community provision or initiatives/midnight leagues</td></tr> <tr> <td>4</td><td>(named initiatives)</td><td>Accept named contemporary community initiative/s eg Hook a Kid on golf</td></tr> <tr> <td>5</td><td>(schools)</td><td>School provision/intra-mural sport</td></tr> <tr> <td>6</td><td>(camps)</td><td>Summer camps such as private or state or weight management or hockey</td></tr> <tr> <td>7</td><td>(little league)</td><td>Little league/Pop Warner or Biddy basketball or Pee wee baseball or other example of little league/community sports teams</td></tr> <tr> <td>8</td><td>(gym)</td><td>(private) gym/gym at work/jogging culture/country clubs</td></tr> <tr> <td colspan="3">Explanation of greater opportunities in UK:</td></tr> <tr> <td>9</td><td>(club)</td><td>More community or club provision/community or taster days/in USA (mainly) limited to private clubs eg gym culture</td></tr> <tr> <td>10</td><td>(mass participation)</td><td>greater emphasis on excellence/winning in USA/USA selection by professional sport/scholarship increase drop out in USA</td></tr> <tr> <td>11</td><td>(money)</td><td>High level sport less commercial/money to be made from participation as well as spectatorism in UK</td></tr> <tr> <td>12</td><td>(tradition)</td><td>Tradition of participation in UK/tradition of spectatorism in USA/more common to watch than play in USA</td></tr> <tr> <td>13</td><td>(initiatives)</td><td>Government or school or NGB or other initiatives for participation and healthy lifestyles in UK</td></tr> <tr> <td>14</td><td>(NC)</td><td>National curriculum for schools (and subject aims of exams in PE) emphasises participation and healthy balanced lifestyles</td></tr> <tr> <td>15</td><td>(training)</td><td>Training opportunities via NGB or JSLA (CSLA/HSLA)</td></tr> <tr> <td>16</td><td>(mini games)</td><td>Mini versions of major games such as Kwik cricket</td></tr> <tr> <td>17</td><td>(HCC)</td><td>Home country council or target group work to increase participation</td></tr> <tr> <td>18</td><td>(funding)</td><td>Lottery funding/funding from government agencies/other organisations</td></tr> </table>	Strategies/provision in the USA:			1	(Title IX)	Title IX/equality of provision/equality of funding	2	(role models)	Promotion of role models to encourage participation	3	(midnight leagues)	Community provision or initiatives/midnight leagues	4	(named initiatives)	Accept named contemporary community initiative/s eg Hook a Kid on golf	5	(schools)	School provision/intra-mural sport	6	(camps)	Summer camps such as private or state or weight management or hockey	7	(little league)	Little league/Pop Warner or Biddy basketball or Pee wee baseball or other example of little league/community sports teams	8	(gym)	(private) gym/gym at work/jogging culture/country clubs	Explanation of greater opportunities in UK:			9	(club)	More community or club provision/community or taster days/in USA (mainly) limited to private clubs eg gym culture	10	(mass participation)	greater emphasis on excellence/winning in USA/USA selection by professional sport/scholarship increase drop out in USA	11	(money)	High level sport less commercial/money to be made from participation as well as spectatorism in UK	12	(tradition)	Tradition of participation in UK/tradition of spectatorism in USA/more common to watch than play in USA	13	(initiatives)	Government or school or NGB or other initiatives for participation and healthy lifestyles in UK	14	(NC)	National curriculum for schools (and subject aims of exams in PE) emphasises participation and healthy balanced lifestyles	15	(training)	Training opportunities via NGB or JSLA (CSLA/HSLA)	16	(mini games)	Mini versions of major games such as Kwik cricket	17	(HCC)	Home country council or target group work to increase participation	18	(funding)	Lottery funding/funding from government agencies/other organisations	
Strategies/provision in the USA:																																																														
1	(Title IX)	Title IX/equality of provision/equality of funding																																																												
2	(role models)	Promotion of role models to encourage participation																																																												
3	(midnight leagues)	Community provision or initiatives/midnight leagues																																																												
4	(named initiatives)	Accept named contemporary community initiative/s eg Hook a Kid on golf																																																												
5	(schools)	School provision/intra-mural sport																																																												
6	(camps)	Summer camps such as private or state or weight management or hockey																																																												
7	(little league)	Little league/Pop Warner or Biddy basketball or Pee wee baseball or other example of little league/community sports teams																																																												
8	(gym)	(private) gym/gym at work/jogging culture/country clubs																																																												
Explanation of greater opportunities in UK:																																																														
9	(club)	More community or club provision/community or taster days/in USA (mainly) limited to private clubs eg gym culture																																																												
10	(mass participation)	greater emphasis on excellence/winning in USA/USA selection by professional sport/scholarship increase drop out in USA																																																												
11	(money)	High level sport less commercial/money to be made from participation as well as spectatorism in UK																																																												
12	(tradition)	Tradition of participation in UK/tradition of spectatorism in USA/more common to watch than play in USA																																																												
13	(initiatives)	Government or school or NGB or other initiatives for participation and healthy lifestyles in UK																																																												
14	(NC)	National curriculum for schools (and subject aims of exams in PE) emphasises participation and healthy balanced lifestyles																																																												
15	(training)	Training opportunities via NGB or JSLA (CSLA/HSLA)																																																												
16	(mini games)	Mini versions of major games such as Kwik cricket																																																												
17	(HCC)	Home country council or target group work to increase participation																																																												
18	(funding)	Lottery funding/funding from government agencies/other organisations

2 (c)	<p>Explain the growth and development of association football in Australia. How does this compare with the development of association football in the UK?</p> <p>5 marks for 5 of: Sub max 3 from Australia or UK</p> <table border="1"> <tr> <th colspan="3">Growth and development of football in Australia</th></tr> <tr> <th colspan="3">Early days:</th></tr> <tr> <td>1</td><td>(ethnicity)</td><td>Game associated with (relatively recent) immigrants</td></tr> <tr> <td>2</td><td>(no accepted)</td><td>Australia wanted own game/game not accepted or adopted initially</td></tr> <tr> <td>3</td><td>(concern)</td><td>Concern that soccer would become top sport (above rugby code/s and Aussie rules)</td></tr> <tr> <td>4</td><td>(violence)</td><td>Spectator and player violence associated with ethnic rivalry (made it widely unacceptable)</td></tr> <tr> <td>5</td><td>(media/spon)</td><td>Limited media interest or sponsorship</td></tr> <tr> <th colspan="3">More recently:</th></tr> <tr> <td>6</td><td>(NGB)</td><td>Improved leadership or efficiency of governing body/Gov Body has improved image of the game eg teams can no longer have 'home' country ref in name eg Sydney Hellas now Sydney Knights</td></tr> <tr> <td>7</td><td>(ethnicity)</td><td>Reduced ethnic troubles as ethnic origin teams no longer recognised</td></tr> <tr> <td>8</td><td>(media/ sponsorship)</td><td>Increased media coverage or support or interest or sponsorship/merchandising</td></tr> <tr> <td>9</td><td>(school/ community)</td><td>Popular in schools or communities</td></tr> <tr> <td>10</td><td>(AIS - elite)</td><td>Supported by AIS</td></tr> <tr> <td>11</td><td>(role models)</td><td>Role models/Australian players in European leagues or English Premiership</td></tr> <tr> <td>12</td><td>(success)</td><td>(raised profile due to): increased international success of national team/success in (2006) World Cup</td></tr> </table>	Growth and development of football in Australia			Early days:			1	(ethnicity)	Game associated with (relatively recent) immigrants	2	(no accepted)	Australia wanted own game/game not accepted or adopted initially	3	(concern)	Concern that soccer would become top sport (above rugby code/s and Aussie rules)	4	(violence)	Spectator and player violence associated with ethnic rivalry (made it widely unacceptable)	5	(media/spon)	Limited media interest or sponsorship	More recently:			6	(NGB)	Improved leadership or efficiency of governing body/Gov Body has improved image of the game eg teams can no longer have 'home' country ref in name eg Sydney Hellas now Sydney Knights	7	(ethnicity)	Reduced ethnic troubles as ethnic origin teams no longer recognised	8	(media/ sponsorship)	Increased media coverage or support or interest or sponsorship/merchandising	9	(school/ community)	Popular in schools or communities	10	(AIS - elite)	Supported by AIS	11	(role models)	Role models/Australian players in European leagues or English Premiership	12	(success)	(raised profile due to): increased international success of national team/success in (2006) World Cup	
Growth and development of football in Australia																																															
Early days:																																															
1	(ethnicity)	Game associated with (relatively recent) immigrants																																													
2	(no accepted)	Australia wanted own game/game not accepted or adopted initially																																													
3	(concern)	Concern that soccer would become top sport (above rugby code/s and Aussie rules)																																													
4	(violence)	Spectator and player violence associated with ethnic rivalry (made it widely unacceptable)																																													
5	(media/spon)	Limited media interest or sponsorship																																													
More recently:																																															
6	(NGB)	Improved leadership or efficiency of governing body/Gov Body has improved image of the game eg teams can no longer have 'home' country ref in name eg Sydney Hellas now Sydney Knights																																													
7	(ethnicity)	Reduced ethnic troubles as ethnic origin teams no longer recognised																																													
8	(media/ sponsorship)	Increased media coverage or support or interest or sponsorship/merchandising																																													
9	(school/ community)	Popular in schools or communities																																													
10	(AIS - elite)	Supported by AIS																																													
11	(role models)	Role models/Australian players in European leagues or English Premiership																																													
12	(success)	(raised profile due to): increased international success of national team/success in (2006) World Cup																																													

Question Number	Expected Answer		Mark
2 (c) continued	Comparison with development of football in UK:		
	13 (mob game)	(Different) - started as mob or pre-industrial or violent game/earlier development than in Australia	
	14 (public schools)	(Different) - taken into C19th public schools (and cleaned up)	
	15 (Amateurism)	(Similar) - amateurism/amateur at school or local club level	
	16 (working class)	(Different) - became working class game/ the people's game/game of urban industrial Britain/factory teams	
	17 (professionalism)	(Different)- professionalism developed early/opportunity for working class/escape from factory/	
	18 (ethnicity)	(different) growth not linked with ethnicity/linked with class/the game can be a chance for upward social mobility or star status for those from minority groups	
	19 (violence)	(similar) some violence by players and/or spectators sometimes/(similar) work done to limit such troubles BUT not elusively linked to ethnicity	
	20 (media/ sponsorship)	(similar) massive media impact and/or influence/ref golden triangle	
	21 (NGB)	FA a highly efficient business/various campaigns eg 'respect'	

<p>2 (d)</p> <p>18-20</p>	<p>Compare the provision for Physical Education and school sport in Australia and the UK. To what extent do cultural factors influence provision for Physical Education and school sport in Australia?</p> <p>A2 level descriptors</p> <p>Level 4:- a comprehensive answer</p> <ul style="list-style-type: none"> • detailed knowledge & excellent understanding • detailed analysis and excellent critical evaluation • well-argued, independent opinion and judgements which are well supported by relevant practical examples • very accurate use of technical and specialist vocabulary • high standard of written communication throughout. <p>Discriminators from L3 are likely to include:</p> <ul style="list-style-type: none"> • <i>reference to negatives (in spite of good provision) eg obesity</i> • <i>effective comparisons that are well structured within answer</i> • <i>comprehensive coverage of cultural factors that influence provision with analysis/evaluation of relative influence.</i> 	
<p>13-17</p>	<p>Level 3:- a competent answer</p> <ul style="list-style-type: none"> • good knowledge & clear understanding • good analysis and critical evaluation • Independent opinions and judgements will be present but may not always be supported by relevant practical examples • generally accurate use of technical and specialist vocabulary • written communication is generally fluent with few errors. <p>Discriminators from L2 are likely to include:</p> <ul style="list-style-type: none"> • <i>good attempts at comparison</i> • <i>a greater number of points made/more depth to answer</i> • <i>competent coverage of cultural factors that influence provision with an attempt at analysis/evaluation of relative influence.</i> 	
<p>8-12</p>	<p>Level 2: - a limited answer</p> <ul style="list-style-type: none"> • limited knowledge & understanding • some evidence of analysis and critical evaluation • opinion and judgement given but often unsupported by relevant practical examples • technical and specialist vocabulary used with limited success • written communication lacks fluency and contains errors. <p>Discriminators from L1 are likely to include:</p> <ul style="list-style-type: none"> • <i>attempts at comparisons</i> • <i>some understanding of links between culture and provision with possible attempts at analysis /evaluations.</i> 	
<p>0-7</p>	<p>Level 1: - a basic answer</p> <ul style="list-style-type: none"> • basic knowledge & little understanding • little relevant analysis or critical evaluation • little or no attempt to give opinion or judgement • little or no attempt to use technical and specialist vocabulary • errors in written communication will be intrusive. 	

Indicative content

	PE in Australia:	Similarities with UK:
Positive evidence		
1 (SEPEP)	<ul style="list-style-type: none"> (SEPEP – sport education and physical education programme) 100 minutes per week for both PE and sport/framework can be adapted by schools 	Schools Not similar <ul style="list-style-type: none"> UK has National curriculum
2 (school games)	Intra and Inter school games <ul style="list-style-type: none"> Pacific games 	Similar in most schools/ <ul style="list-style-type: none"> work of SSCOs/ variable provision
3 (options)	Range of options that increase likelihood of participation	Similar in most schools <ul style="list-style-type: none"> work of SSCOs/ variable provision
4 (Fundamental Skills Programme)	Fundamental Skills Programme <ul style="list-style-type: none"> basic skills for junior schools/ /skilfulness likely to encourage continued participation 	Not similar <ul style="list-style-type: none"> work of SSCOs/ non-specialists in junior schools Similar <ul style="list-style-type: none"> Active sport/top sport/ dragon sport
5 (PASE)	(PASE - Physical and sport education) <ul style="list-style-type: none"> professional development (INSET) programme for (non-specialist) teachers 	Some similarity as INSET available <ul style="list-style-type: none"> BUT less opportunity for PE specific INSET for non-specialists/ pressure on INSET budgets
6 (sport linkage)	<ul style="list-style-type: none"> School club links sharing of facilities/pathway for talented children to progress to clubs 	Similar <ul style="list-style-type: none"> more for interest than necessarily talent
7 (exemplary schools)	Exemplary schools <ul style="list-style-type: none"> (with good programmes funded to) share good practice 	Not similar <ul style="list-style-type: none"> however - beacon schools or independent schools often highly regarded
8 (sport/talent search)	Sports or Talent Search/Talent ID	Similar/Idea copied <ul style="list-style-type: none"> ref Talent ID for 2012
9 (awards)	State awards/awards for achievement <ul style="list-style-type: none"> de Coubertin award for non sporting achievement (eg participation or fair play) 	Some similarities with local awards

10 (role models)	Elite athletes as role models	Some similarity/but less structured use of role models/funding does not depend on their work
11(sports leaders)	Sports leaders <ul style="list-style-type: none"> (older students who help teacher/sports leadership part of syllabus/sports leadership include coaching, officiating, leading 	<ul style="list-style-type: none"> CSLA available to some/coaching, officiating/leading part of examination PE
12 (YDP)	Youth development programme – quality Outdoor Ed programme/D of E	<ul style="list-style-type: none"> D of E/ outdoor education programmes
However		
13 (obesity)	Serious obesity problems	Similar
14 (inactivity)	Problems with inactivity in young people <ul style="list-style-type: none"> Post-16 drop out 	Similar
Cultural factors – influence on provision for PE/Sport in Australia		
15 (historical 1)	Copy of UK system <ul style="list-style-type: none"> eg house competitions 	
16 (historical 2)	British sports adopted in schools	
17 (geography)	Favourable climate for outdoor sports <ul style="list-style-type: none"> high status of swimming in schools due to favourable climate 	
18 (O Ed)	High status of O Ed due to environmental factors	
19 (Govt)	School sport high on federal or state agendas <ul style="list-style-type: none"> good support for school sport 	
20 (social determinants)	Egalitarian society <ul style="list-style-type: none"> antidiscrimination/sport for all/equality of opportunity, provision and esteem

4 (d)	<p>Sketch a free body diagram to show the forces acting on a ball with topspin during flight.</p> <p>Examine the effects of different types of spin on a ball during flight and when bouncing.</p> <p>Evaluate the advantages and disadvantages of each type of spin in sport.</p> <p>A2 level descriptors</p>	
18-20	<p>Level 4:- a comprehensive answer</p> <ul style="list-style-type: none"> • detailed knowledge & excellent understanding • detailed analysis and excellent critical evaluation • well-argued, independent opinion and judgements which are well supported by relevant practical examples • very accurate use of technical and specialist vocabulary • high standard of written communication throughout. <p>Discriminators from L3 are likely to include:</p> <ul style="list-style-type: none"> • <i>free body diagram to show all forces correctly</i> • <i>description of effect of all 3 main types of spin on both flight path and bounce of a ball</i> • <i>good range of advantages and disadvantages of all types of spin with substantial and relevant examples from sport. Top end of this level will cover advantages and disadvantages of both flight path and bouncing balls.</i> 	
13-17	<p>Level 3:- a competent answer</p> <ul style="list-style-type: none"> • good knowledge & clear understanding • good analysis and critical evaluation • independent opinion and judgements will be present but may not always be supported by relevant practical examples • generally accurate use of technical and specialist vocabulary • written communication is generally fluent with few errors. <p>Discriminators from L2 are likely to include:</p> <ul style="list-style-type: none"> • <i>free body diagram showing all forces</i> • <i>description of the effect of most of the types of spin on both the flight path and bounds of a ball</i> • <i>a range of advantages and disadvantages of most types of spin with some relevant examples from sport. Bottom end of this level may not cover the advantages/disadvantages of spin on either flight path or bounce of a ball.</i> 	
8-12	<p>Level 2:- a limited answer</p> <ul style="list-style-type: none"> • limited knowledge & understanding • some evidence of analysis and critical evaluation • opinion and judgement given but often unsupported by relevant practical examples • technical and specialist vocabulary used with limited success • written communication lacks fluency and contains errors. 	

Question Number	Expected Answer	Mark
4 (d) continued	<p>Discriminators from L1 are likely to include:</p> <ul style="list-style-type: none"> • <i>free body diagram shows some of the forces accurately but at the lower end of this level they are shown inaccurately</i> • <i>description of the effects of some types of spin on the flight path and bounce of a ball</i> • <i>some advantages/disadvantages are covered with limited accuracy. To reach the higher end of this level candidates should make reference to both flight paths and the bounce of the ball.</i> 	
0-7	<p>Level 1:- a basic answer</p> <ul style="list-style-type: none"> • basic knowledge & little understanding • little relevant analysis or critical evaluation • little or no attempt to give opinion or judgement • little or no attempt to use technical and specialist vocabulary • errors in written communication will be intrusive. 	
	<p>Indicative content</p> <p>(Free body diagram)</p> <ol style="list-style-type: none"> 1 W/weight acting from CM of the ball 2 AR/air resistance acting from CM opposite the direction of motion 3 Magnus/force acting downwards perpendicular to direction of motion  <p>(Effects of spin on flight path)</p> <ol style="list-style-type: none"> 4 All spins cause non parabolic/asymmetrical flight paths 5 Spin gives stability in flight 6 (Advantage) More accuracy eg Shooting in football 7 (Disadvantage) More predictable flight path which makes it easier for opposition/no spin makes for less predictable flight path eg Ronaldo free kick/volleyball serve 	

	<p>(Topspin-flight)</p> <p>8 Topspin makes flight path shorten</p> <p>9 (advantage) Can hit ball harder and still goes in eg topspin drive in table tennis</p> <p>10 (advantage) Can confuse opposition where ball will land eg flipper in cricket</p> <p>11 (disadvantage) Lose distance eg drive in golf</p> <p>12 Topspin makes ball dip in flight</p> <p>13 (advantage) Can hit ball higher over obstacles and still go in eg volley over GK in football</p> <p>14 (disadvantage) If not hit high enough ball hits obstacle eg topspin drive in tennis</p> <p>(Backspin-flight)</p> <p>15 Backspin makes flight path lengthen</p> <p>16 (advantage) Hit ball further eg drive in golf</p> <p>17 (disadvantage) Ball travels too far before landing eg sliced backhand in tennis</p> <p>18 Backspin makes ball hang in the air</p>	
	<p>19 (advantage) Gives more time to recover before next shot eg defence in table tennis</p> <p>20 (disadvantage) Gives opponent more time to attack eg opponent can move into volley in tennis</p> <p>(Side spin-flight)</p> <p>21 Sidespin makes ball swerve in flight</p> <p>22 (advantage) Can move ball around obstacles eg free kick around a wall in football</p> <p>23 (disadvantage) Ball can deviate too far eg slice/hook in golf</p> <p>(Effect of spin on bounce)</p> <p>24 Spin can cause balls to bounce in unpredictable fashion</p> <p>25 (advantage) Confuse opponent eg leg break in cricket</p> <p>26 (disadvantage) Confuse team mates eg passes with spin in football</p> <p>(Topspin-bounce)</p> <p>27 Topspin makes ball shoot forward when bouncing</p> <p>28 (advantage) Keeps opponent back/from attacking eg tennis</p> <p>29 (advantage) Can keep ball lower eg drive in squash/flipper in cricket</p>	
	<p>(Backspin-bounce)</p> <p>30 Backspin makes ball sit up on bouncing</p> <p>31 (advantage) Drop shots with backspin make opponent move further eg tennis</p> <p>32 (advantage) Gives more control over ball on landing eg pitch in golf</p> <p>33 (disadvantage) Easy for an opponent to attack eg tennis</p> <p>(Sidespin-bounce)</p> <p>34 Sidespin does not cause deviation on bouncing</p> <p>35 (advantage) Ball carries on swerving after bouncing eg slice serve in tennis</p> <p>36 (disadvantage) Ball can swerve too much after bouncing eg low shot in football</p>	[20]
	TOTAL	[35]

Question Number	Expected Answer	Mark
Section B - Exercise and Sport Physiology		
5 (a)	<p>The recovery process returns the body to its pre-exercise state. Describe the main processes involved in the alactacid component of recovery.</p> <p>5 marks in total</p> <ol style="list-style-type: none"> 1 The alactacid component occurs first 2 using some of the excess post exercise oxygen consumption 3 process restores the ATP (and) PC stores depleted during exercise 4 The energy for these (reversible) endothermic reactions; 5 is made available by the aerobic breakdown of fats and carbohydrate/uses aerobic system 6 the alactacid component takes between two and three minutes for full recovery 7 and uses up to 4 litres of oxygen/O₂ consumption remains high 8 It takes approximately 30 seconds to resynthesise 50% of PC stores 9 During this component the myoglobin oxygen stores are replenished 	[5]
5 (b)	<p>Explain what is meant by the term metabolic equivalent. How can knowledge of METs be useful to a performer?</p> <p>4 marks in total</p> <p><i>Sub max 3 marks – what is meant by</i></p> <ol style="list-style-type: none"> 1 MET/metabolic equivalent is a way of expressing energy cost 2 is the ratio of the work metabolic rate to the resting metabolic rate 3 it estimates the energy cost of an activity by amount of oxygen consumed 4 one MET is equivalent to the resting VO₂ (3.5 ml/kg/min) 5 one MET is equal to a specific calorific amount (0.0175kcal/kg/min or 1kcl/kg/hr) <p><i>sub max 2 marks – how it helps the performer</i></p> <ol style="list-style-type: none"> 6 low intensity activity will be equivalent to small number of METS (eg walking is 2METS)/high intensity activity higher number of METS/to know how hard they are working 7 can calculate the overall energy cost of a training session/workload 8 can adjust diet according to the number of calories burned 9 can use METS to estimate BMR 	[4]

Question Number	Expected Answer	Mark
5 (c)	<p>Carbohydrates are a valuable source of energy. Why is it important for a performer to ensure that they have adequate supplies of carbohydrate? How can a performer make sure that they don't deplete their stores of carbohydrate? 6 marks in total</p> <p><i>Sub max 3 marks –why are they important</i></p> <p>1 carbohydrate is the only fuel that can be broken down anaerobically/needed for high intensity work for more than 10 secs</p> <p>2 carbohydrate can also be broken down aerobically/main fuel for first 20 mins of exercise</p> <p>3 carbohydrate is needed to ensure the efficient breakdown of fats</p> <p>4 there are limited stores of carbohydrate in the body</p> <p>5 carbohydrates contain 4Kcals per gram</p> <p><i>sub max 3 marks – how can stores be maintained</i></p> <p>6 performer can eat a high carbohydrate diet</p> <p>7 performer can carbo-load before an event/glycogen sparing</p> <p>8 performer can eat a high carbohydrate meal before the event (low GI foods)</p> <p>9 performer can drink/eat carbohydrates during event eg banana/sports drink</p> <p>10 performer can replace carbohydrates used immediately after the event (high GI foods/drink)</p> <p>11 pacing during event/take opportunities to recover</p>	

<p>5 (d)</p> <p>18-20</p>	<p>Devise a six month training programme that will develop aerobic capacity. Justify your programme by referring to the theory of periodisation and the principles of training.</p> <p>A2 levels descriptors</p> <p>Level 4:- a comprehensive answer</p> <ul style="list-style-type: none"> • detailed knowledge & excellent understanding • detailed analysis and excellent critical evaluation • well-argued, independent opinion and judgements which are well supported by relevant practical examples • very accurate use of technical and specialist vocabulary • high standard of written communication throughout. <p>Discriminators from L3 are likely to include:</p> <ul style="list-style-type: none"> • <i>creation of a detailed and appropriate progressive 6 month programme</i> • <i>training aims of each cycle clearly stated</i> • <i>excellent justification of programme with reference to both periodisation and training principles</i> • <i>appropriate monitoring and evaluation throughout programme included.</i> 	
<p>13-17</p>	<p>Level 3:- a competent answer</p> <ul style="list-style-type: none"> • good knowledge & clear understanding • good analysis and critical evaluation • Independent opinions and judgements will be present but may not always be supported by relevant practical examples • generally accurate use of technical and specialist vocabulary • written communication is generally fluent with few errors. <p>Discriminators from L2 are likely to include:</p> <ul style="list-style-type: none"> • <i>creation of a 6 month progressive programme with micro, meso and macro cycles identified</i> • <i>overall training aim stated for the programme</i> • <i>good justification of the programme with reference to training principles</i> • <i>initial evaluation of aerobic capacity used to set goals</i> 	
<p>8-12</p>	<p>Level 2:- a limited answer</p> <ul style="list-style-type: none"> • limited knowledge & understanding • some evidence of analysis and critical evaluation • opinion and judgement given but often unsupported by relevant practical examples • technical and specialist vocabulary used with limited success • written communication lacks fluency and contains errors. <p>Discriminators from L1 are likely to include:</p> <ul style="list-style-type: none"> • <i>creation of a 6 month programme with some progression shown</i> • <i>some justification of the programme given with reference to training principles</i> • <i>general aim of programme given but with no reference to periodisation or monitoring and evaluation.</i> 	

0-7	<p>Level 1:- a basic answer</p> <ul style="list-style-type: none"> • basic knowledge & little understanding • little relevant analysis or critical evaluation • little or no attempt to give opinion or judgement • little or no attempt to use technical and specialist vocabulary • errors in written communication will be intrusive. 	
	<p>Indicative content</p> <p>(Periodisation)</p> <ol style="list-style-type: none"> 1 Initial assessment <ul style="list-style-type: none"> • age/current activity levels/PARQ/health screening/aim 2 Fitness testing <ul style="list-style-type: none"> • multi-stage fitness test to estimate VO_2 max • Cooper 12 minute run based on distance covered • PWC170 use of HR 3 Macrocycle <ul style="list-style-type: none"> • Long term objective/usually year/could be 6 months for some sports • Reach physiological peak at right time • Increase VO_2 max/increase % VO_2 max at which OBLA occurs • Made up of a number of mesocycles 4 Mesocycle <ul style="list-style-type: none"> • Medium term objective/1 to 4 months/depends on sport/objective • Increase in CV endurance • Could be pre-season/competitive/off season • Made up of a number of microcycles 5 Microcycle <ul style="list-style-type: none"> • Short term objective/1 to 3 weeks/recurrent units • Made up of a number of training sessions 6 Pre-season <ul style="list-style-type: none"> • Characterised by development of basic all round fitness • Progressively increase in intensity/focus on aerobic fitness 7 Tapering <ul style="list-style-type: none"> • Close to event training load reduced/recovery periods longer • Ensure fuels/glycogen levels are high for event 8 Competitive season <ul style="list-style-type: none"> • Maintenance of aerobic fitness levels • Training sessions reduced to avoid burn out 9 Off/transition season <ul style="list-style-type: none"> • Rest/low level activity/active recovery/cross training <p>(Principles of training)</p> <ol style="list-style-type: none"> 10 Specificity <ul style="list-style-type: none"> • Muscles used/movement patterns/fibre type/energy system 11 Moderation <ul style="list-style-type: none"> • Prevent injury/allow sufficient recovery/particularly at start 12 Overload <ul style="list-style-type: none"> • Make body work harder/increase stress on the body • Increase frequency/intensity/time or distance/type 	[20]

	<p>13 FITT</p> <ul style="list-style-type: none"> • (F) 2/3+ a week • (I) 60-80% VO₂/HR max • (T) 20+ mins/3km+ <p>14 Continuous/Fartlek</p> <ul style="list-style-type: none"> • All body exercises • Running/swimming/cycling • altitude <p>15 Interval training</p> <ul style="list-style-type: none"> • 1 set of 3-4 reps • work interval 3+ mins • work-relief ratio 1:1/0.5 <p>16 Progression</p> <ul style="list-style-type: none"> • Once adaptations have been made further increases in workload • Increase frequency/intensity/time/distance by 10% • Best to increase time/distance as overloading aerobic <p>17 Variance</p> <ul style="list-style-type: none"> • Different types of training • Different types of exercise • Prevent boredom/overuse injury/maintain motivation <p>18 Monitoring/evaluating</p> <ul style="list-style-type: none"> • Training diary/regular testing • Reversibility • Conduction of a gap analysis

Grade Thresholds

Advanced GCE Physical Education H154 H554
January 2010 Examination Series

Unit Threshold Marks

Unit		Maximum Mark	A*	A	B	C	D	E	U
G451	Raw	90	n/a	53	47	41	35	29	0
	UMS	120	n/a	96	84	72	60	48	0
G452	Raw	105	84	75	66	57	48	39	0
	UMS	140	126	112	98	84	70	56	0

Specification Aggregation Results

Overall threshold marks in UMS (ie after conversion of raw marks to uniform marks)

	Maximum Mark	A	B	C	D	E	U
H154	200	160	140	120	100	80	0

The cumulative percentage of candidates awarded each grade was as follows:

	A	B	C	D	E	U	Total Number of Candidates
H154	4.95	15.64	39.11	72.67	95.74	100	1010

1010 candidates aggregated this series

For a description of how UMS marks are calculated see:
